## Checking station for job identification based on image content

LithoJobident enables permanent job identification and marking based on image information. Incorrect processing steps or deliveries can thus be effectively prevented.

- Job identification of print products to be delivered or before further processing
- Assignment of produced items without job identifier
- Hard copy printout of job order slips and delivery notes

### Advantages

- Prevention of incorrect deliveries
- Prevention of incorrect further processing steps
- Permanent assignment without barcodes or job numbers
